Project timeline.

For every report, you have three weeks to complete it. It will typically become available on Mondays and you will have to submit via ILIAS about three weeks later, giving you slightly more than three weeks. The first report will come out at the start of week 2, the second report at the start of week 5 and the third and last report at the start of week 9. We may need up to two weeks for marking your reports depending on workload.

Reports are pass/fail. Every pass gives you 1 bonus point for the exam. The maximum number of bonus points therefore is 3.

We expect you to prepare for the exercise groups!

- 6 Leistungspunkte = 180h of work.
- 13 Lectures a 2h & 13 Exercises a 2h = 52h
- 20h preparation and exam
- ...this leaves 108h.
- ... or about 8h of self-organised work every week including reports.

Marking

- Written exam after the end of lecture times
 - up to 40 marks
 - need 20 marks to pass
- A mock exam will be provided in due time to help you prepare.
- Three voluntary reports over the course of the semester
 - pass or fail, no marks
 - each pass gives +1 mark to exam
 - need to validate code in YAPS for report to be marked
